Remarks:

- The results mentioned above are only related to the sample received by the laboratory.
- U: the expanded measurement uncertainty U (by multiplying the measurement uncertainty with factor 2 what produces a 95% reliability interval) is expressed as % of the analysis result x. Result to be read as $x \pm U$.
- #: for pesticides is the measurement uncertainty compliant with the value of 50 % of the document SANCO/12571/2013 E13
- For pesticides should the process factor (concentration factor) of dried, concentrated or processed products, be used to recalculate the analytical result before comparing it with the legal limits (that are valid on unprocessed products).
- Fytolab can not be held responsible for any errors in the legal regulation mentioned in this report. These are made available solely for the purpose of information and refer to the products as specified in the applicable legislation.
- (*): tolerance not assignable, see relevant legislation.
